LANGUAGES

- Arabic: Mother Language
- English: Good

Professional Summary

Experienced PHP Developer with 3+ years of expertise in designing and developing scalable web applications using Laravel. Skilled in integrating complex systems like Firebase notifications and payment gateways, optimizing backend performance, and implementing best practices. Passionate about leveraging modern technologies to build user-centric, high-performance applications. Holds a Bachelor's degree in Computer Science and is committed to continuous learning and delivering high-quality solutions.

EDUCATION

Al-Balqa Applied University, Irbid - Jordan (2015 - 2019)

- Bachelor's Degree in Information Technology with a major in Computer Science (CS)

Core Competencies

- Object-Oriented Programming (OOP)
- PHP and Laravel Framework
- RESTful API Development
- Database Optimization and Query Handling
- MVC Architecture Design
- Version Control (GitHub)
- Firebase Integration
- Payment Gateway Integration (PayPal, others)
- Team Collaboration and Communication
- Design Patterns – Service, Repository
- Livewire – Proficient
- Server Management – Proficient

Professional Experience

Senior Backend Developer

Ministry of Labour · Full-time – Amman, Jordan

Jan 2026 – Present

Building and maintaining PHP/Laravel product applications on Windows Servers.

- Integrating third-party APIs (payments, notifications, external services).
- Architecting and scaling high-performance backend systems using **Laravel**, serving **hundreds of thousands of users** across government platforms.
- Designed and implemented distributed systems using **Redis & Queue Workers**, processing **millions of background jobs** (notifications, transactions, async tasks).
- Built and optimized RESTful APIs handling **high request throughput (10K+ daily requests)** with consistent low latency.
- Integrated secure third-party services including **OTP systems, and Firebase push notifications**.
- Improved application performance by implementing **advanced caching strategies (Redis)**, reducing response time by up to **60%**.
- Optimized complex database queries and indexing strategies, significantly improving system scalability under heavy load.
- Ensured high system reliability with **fail-safe queue handling, retries, and monitoring**.
- Led backend architecture decisions and enforced **clean code, SOLID principles, and security best practices**.
- Collaborated with cross-functional teams to deliver critical systems on tight government deadlines.

Senior Backend Developer

Ministry of Planning and International Cooperation · Full-time – Amman, Jordan

Jun 2025 – Dec 2025

Building and maintaining PHP/Laravel product applications on Windows Servers.

- Integrating third-party APIs (payments, notifications, external services).
- Developed scalable backend solutions using **Laravel**, supporting large-scale government systems.
- Implemented **queue-based architecture (Redis)** for asynchronous processing, improving system efficiency and responsiveness.
- Integrated multiple external APIs and national systems with secure and reliable data exchange.
- Refactored legacy systems and optimized database performance, reducing system load and improving stability.
- Contributed to handling **high-volume traffic systems with thousands of concurrent users**.
- Applied structured architecture patterns to maintain long-term scalability and maintainability.
- Participated in production deployments and ensured system stability in real-world environments.

PHP Developer

Datos Solutions · Full-time – Amman, Jordan

December 2021 – Apr 2025

- Developed and maintained web applications using PHP and Laravel framework.
- Integrated third-party APIs, including payment gateways and notification systems.
- Designed scalable and secure backend solutions to support high-traffic applications.
- Collaborated with cross-functional teams to deliver projects on time and within scope.

Notable Projects

● Sajjil

- National Employment Program "Tashgheel".
- URL: <https://www.sajjil.gov.jo> .

● Huruf Silver

- E-commerce platform specializing in jewelry sales.
- Features: Product categories, detailed item descriptions, and secure online purchases.
- URL: <https://www.huruf.store/guest/index>

● Aero Marts

- Multi-vendor e-commerce platform with advanced features.
- Features: Guest mode, multi-language, multi-currency, online payments.
- Uri: <https://aeromarts.com>

● Ghozlan delivery

- Delivery system for restaurants and drivers.
- Features: Real-time tracking, multi-language support, and payment management. •
- URL: [Google Play](#)

● Curans

- Virtual patient simulator for medical professionals.
- Features: Realistic and interactive simulations.
- URL: <https://curans.org>

● Future HR

- Human resources management system with advanced employee features.
- Features: Face ID check-in, leave requests, multi-theme support.

● Sabaya Taxi

- Digital network for transportation and logistics.
- Features: Real-time tracking, notifications, and secure data validation.

CHARACTERISTICS

- Positive Attitude
- Team Player
- Patient and Responsible
- Accurate and Detail-Oriented
- Committed and Creative
- Hardworking and Eager to Learn

Technical Skills

- PHP (Proficient)
- Laravel (Proficient)
- RESTful APIs (Proficient)
- Database Management (Proficient)
- Git/GitHub (Proficient)
- Firebase, PayPal Integration (Proficient)
- Design Patterns – Service, Repository
- Livewire – Proficient
- Server Management – Proficient
